PROFILE

MSc Computing student at Edinburgh Napier University (2027 graduate) with a strong foundation in full-stack software development, cloud infrastructure, and real-time networked systems. Experienced in building and deploying production-grade applications using Python, JavaScript, and Java. Demonstrated leadership through managing a 4-person startup team from concept to prototype. Seeking an internship opportunity where I can contribute technically, grow professionally, and deliver real impact.

TECHNICAL SKILLS

Languages: Python, JavaScript (Node.js), Java, PHP, Bash/Shell Scripting

Web & Mobile: React.js, Express.js, Flutter, HTML, CSS, Material UI, Bootstrap

Databases: MongoDB, MySQL, Firebase

Cloud & DevOps: AWS EC2, AWS S3, Azure, Git, GitHub, Linux

Networking & APIs: REST APIs, WebRTC, Socket.io, Wireshark, WebSockets

Testing & Performance: LoadRunner, JConsole, VisualVM, Unit Testing, Shell Scripting

Tools & Platforms: Android Studio, Salesforce (familiar), Jira (familiar)

EDUCATION

MSc Computing *Jan 2025 – Present*

Edinburgh Napier University, Edinburgh, UK Expected Graduation: Jun 2027

- Modules: Management of Software Projects, Digital Business Environments, Web Design & Development.
- Professional Placement pathway structured for industry experience alongside academic study.

B.Tech Computer Science & Information Technology *2021 – 2024*

JNTU-H, MLRIT, India CGPA: 6.92 / 10

- Ranked 2014 in TS-ECET 2021 entrance examination out of tens of thousands of applicants.

PROJECTS

Eon Distributed Version Control System *2025*

- Built a Git-inspired version control backend with real-time commit, branch, push/pull functionality using WebSocket and REST APIs.
- Deployed on AWS EC2 and S3 for scalable cloud hosting and binary file management.
- Conducted load testing with LoadRunner and profiled performance using JConsole and VisualVM, resolving critical API bottlenecks.
- **Stack::** Node.js, Express.js, React, MongoDB, Socket.io, AWS, Shell Scripting.

Lyno Real-Time Video Conferencing Platform. *2025*

- Engineered a low-latency WebRTC signaling server with real-time media stream management and peer-to-peer negotiation.
- Analysed live network traffic with Wireshark to optimise packet efficiency and reduce connection setup time.
- Implemented JWT authentication and secure session management with a React/MUI frontend dashboard.
- **Stack::** MongoDB, Express.js, React, Node.js, WebRTC, Socket.io, Wireshark.

ParkFair Real-Time Parking solution. *2022 – 2024*

- Led a 4-person team to build an Android app that reduced average parking search time by 35%.
- Progressed through all three stages of the Cisco ThingQbator Incubation Programme, receiving the Award for Excellence.
- Managed project delivery end-to-end: frontend UI, backend development, business model, and unit testing.
- **Stack::** Flutter, Java, MongoDB, Firebase, Android Studio.

House Price Prediction Machine Learning Model. 2024

- Contributed to feature engineering and algorithm optimisation, achieving a 16% improvement in prediction accuracy.
- Built the model's GUI in Python and led data preprocessing and pipeline development.
- **Stack::** Python, scikit-learn, TensorFlow, Pandas, NumPy.

POSITION OF RESPONSIBILITY

Team Leader ParkFair Startup 2022 – 2024

Cisco ThingQbator Incubation Programme

- Led a cross-functional team of four through full product lifecycle from ideation to functional prototype.
- Pitched to industry mentors at each incubation stage; received Award for Excellence at programme conclusion.

Lead Graphic Designer Avinya Student Body Sep 2022 – Jul 2024

- Managed a 3-person design team, producing 40+ promotional materials for campus events.
- Increased event attendance by approximately 65% through targeted visual communications.
- Mentored junior designers in creative and technical skills.

ACHIEVEMENTS & AWARDS

- Cisco ThingQbator Incubation Programme Finalist & Award for Excellence (ParkFair startup).
- Esprit-Critique Competition Runner-Up (Silver Medal) out of 280+ participants in critical thinking.
- TS-ECET 2021 Ranked 2014 nationally in engineering entrance examination.

CERTIFICATIONS

- Java – Alpha (DSA with Java) Apna College.
- Machine Learning & Image Processing Cisco ThingQbator (2022).
- Mobile Application Development Cisco ThingQbator (2022).
- SQL Basic / Intermediate HackerRank (2022).
- Duolingo English Test Score: 120.
